# FROM THE PRINCIPAL'S DESK

As we approach the end of another enriching school year, I am pleased to share this special year-end edition of our e-magazine. Reflecting on the past twelve months, I am filled with immense pride and gratitude for the countless ways our school community has grown, excelled, and come together to face challenges and celebrate successes. This year was marked by significant achievements across various domains. Academically, our students have exceeded expectations, showing remarkable progress and enthusiasm for learning.

Their achievements in the board exams, and in school have been commendable, and our participation in academic competitions has brought numerous accolades to our school. Our athletic teams have shown great spirit and determination, participating in district and state-level tournaments and often emerging victorious. The dedication of our coaches and the persistent efforts of our students have kept our school's flag flying high in the sports arena. The cultural team have put on spectacular performances and showcasing the diverse talents within our school and outside.

These events not only enrich our students' but also strengthen our community by bringing us together to celebrate. We continued to enhance our campus this year, improving facilities to ensure that our students and staff have a conducive environment for learning and teaching. The introduction of new technology in classrooms and the expansion of our digital resources have made learning more interactive and accessible.

Looking ahead, we are excited to continue this momentum into the next academic year with even more programs and opportunities designed to support our students' growth and success. We remain committed to fostering a nurturing environment that encourages life long learning and personal development. I would like to extend my heartfelt thanks to all our staff, parents, and supportive staff for their unwavering support and contribution to our successes. And to our students, your energy and passion are what make our school truly exceptional.

War ravaged society  
- T.Aphiya

I sat in my bed  
Thinking about the existence of man  
What's our purpose? Why were we created?  
Time ticking away, as I lay awake at night  
Is it waging war? Killing our brothers?  
We only live once and we choose to battle  
Desire of wealth, power and fame runs in our veins  
Not thinking the consequences of our actions.  
Watering the crops with blood and tears  
Eating the fruits of pain and death  
Is this our purpose?  
Is this why we were created?  
To harm our brothers?  
I realised how cold blooded humans are  
We can still change.  
We can stop all wars.  
Only if we unite.

## THE GIRL BEHIND THE WHEEL

Sitting on the backseat,  
Looking out the window,  
Driving through the fast lanes,  
Wondering what she was made for.

People said she don't belong here  
But it was just a few in a billion,  
That seemed to be diffident.

Roaming through the labyrinth of life  
To find the truthful purpose of existence.  
In the quiet whispers of the soul's deep call  
She asked "Is this what I was made for?"

For all that she had been doubted,  
A relentless pursuit of purpose  
Lead the path to the bright side.

The roar of the engines;  
The sound of the tires drifting;  
The horsepower under the hood  
Ignited a wild fire in her heart.

In a world of gears, engines, speed and men  
She stood tall and invincible.  
For in her journey we see the power,  
Of resilience, courage and self belief.

She left her mark forevermore.

-Evenitha XA

It's in danger.  
Let's save it,  
By becoming a strong ranger.  
With dying trees and animals,  
Its in sorrow.  
Make green today  
And green tomorrow,  
The melting snow,  
one day it will sink.  
How can we save it?  
Just think,  
Trees are precious,  
Preserve them.  
Water is a treasure,  
Reserve it.

### Save Water

Save water, Save water!  
Water is our life  
Water is used for everything.  
Without water there is nothing.  
We cannot live without it,  
So we should always  
Take care of it.  
Never waste a drop of water,  
All living things need water.  
Together we can save water,  
So Save it.

- V Uagizhini (5A)

In the realm of memories, we stand,  
A farewell's whisper, a parting hand.  
Through the corridors of time, we stride,  
In the tapestry of friendships, forever tied.  
Laughter echoes in the halls,  
As we heed the distant farewell calls.  
Lessons learned, bonds that grew,  
In the heart of school, our journey through.  
Teachers' wisdom, a guiding light,  
You've empowered us with knowledge's power.  
Each lesson a brushstroke, a canvas of the mind,  
Guiding us through challenges, patient and kind.  
Friends, you're the verses in this poetic tale,  
Through highs and lows, we set sail.  
The school bell may fade, but our echoes remain,  
In the corridors of time, an everlasting chain.  
Thank you, our school, for the memories so sweet,  
In our hearts, your rhythm will always beat  
.Farewell, a bittersweet symphony we compose,  
As our separate journeys now unfurl  
With gratitude and a fond adieu, We bid farewell,  
our journey anew  
.In the pages of time, this chapter ends,  
School's embrace, forever transcends.

# Artificial Intelligence:

- Boon or Bane? (In the field of education) “Perhaps paradoxically, quoting computer scientist Shlomo Argamon. In the tapestry of the dynamics of the modern world, we as a generation are open to a number of innovations and are on a constant battlefield while striving to climb the mountains of success. Every student is unique, and they set their direction accordingly. Artificial intelligence (AI) as a boon helps every individual by identifying their needs, adding personalized support, and providing specific resources as per their needs. From ChatGPT (a well known AI site) to Animaker (an example of a website to make animated videos), we all know that they help us break down huge tasks and make them into little and less-time consuming tasks. On the other hand, AI lacks human level creativity and cannot help us to think outside the box, as a result of which there is no human touch. AIs’ are trained on massive database sets and learn how to perform tasks and generate answers based on pre-set data and also past experiences. As being said, they undoubtedly lack emotions, ethics and could possibly make us all lazy potatoes. Hey Alexa, “How can I change the world?” and she’ll reply from her programs that have been fed into her by programmers, aka humans. As a pre-law student myself, I find AI a valuable tool to prepare for my entrance exam as it tries to personalize my learning, helps me analyze a vast amount of data available on the internet, which agreeably minimizes my distractions, enhancing my readiness for the entrance exam. AI has also helped me find my career path, inevitably saving me a lot of time from my side. Although the benefits of AI are extensive, one has to be careful while using the services provided, as there is a risk of biased opinions, unchecked deployment, misinformation, etc. AI is not only revolutionizing the learning experience of students but is also streamlining the administrative side of education. Keeping in mind that AI cannot possibly replace teachers, we can take a positive approach to the notion that AI is a boon to the educational society at large only if we use it thoughtfully and cautiously. In the case of failure to do so, AI could be a bane or curse to all of us. “We, the students of today, are the leaders of tomorrow.” The future is in our hands, and it is up to us to guide this influential asset towards a future that benefits humanity as a whole
